

Project Proposal

1 Project Title

Your machine Learning project.

2 Team Members

- Student 1
- Student 2

3 Project Details

3.1 Project Objective

Please describe your project objective in this part.

- What is the project Objective?
- What problem to solve?
- Why the problem is important?
- Why machine learning can help to solve the problem?

3.2 Datasets

Please describe your dataset in this section.

- What is the data and where you obtain it?
- How the data is collected?
- What will be the features and labels you will use?
- How many examples for training, validation, and testing?

3.3 Machine Learning Algorithm

Please describe the machine learning algorithm you want to use for your project.
Please justify your selection.

3.4 Expected Outcomes

What is your expected outcome for this project?
